Introduction

The right to information is guaranteed by Charter of Fundamental Rights and Freedoms for each citizen. The editor is responsible for truthfulness, completeness and fidelity of information in publications. The main aim is to publish new information for readers. Editorial office does not prioritize any institutions or authors.

Thematic scope and users

Publications are mostly aimed for publishing of original scientific works. Thematically are aimed at agriculture with emphasis on fruit growing. It concerns especially germplasm, breeding, plantation management, plant protection, biotechnologies and storage. Newly bred cultivars are also described. Further areas of interest are natural science, biochemistry, genetics, molecular biology, immunology and microbiology. Scientific articles are published in Czech language with abstracts in Czech and English language. Tables, figures and description of photographs are also translated into English. Most contributions are outputs of research projects. Bibliography of employees of the institute for preceding period is also a part of the publication. Concerning the level of scientific and professional content, issued titles are aimed mostly at fruit growers, nurserymen, employees and students of universities and professional secondary schools, employees of public administration. Issued titles are aimed for broad professional public.

Acceptance for publication

The editorial office is independent. Particular attention is paid to originality of a contribution. Submitted manuscripts must not be published previously in another journal. Editorial office supervises that author is the exclusive owner of copyright. Author should supply written permission of third parties, if the published work contains third party materials. Important is that author should state all persons, who contributed to the published work. Plagiarism is prohibited. Independent review by at least two reviewers should intercept and exclude all low quality contributions. Independent review by at least two reviewers is the condition of acceptance of submitted work.

Work with information

Editorial office cares about quality, novelty, originality, truthfulness and evidence of provided information. At the same time, emphasis is placed on accuracy and completeness of information. Editorial office thoroughly insists on statement of all original sources, which were used for publication. Wilful falsification of information is prohibited.
